DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 6, 7 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Patent Number 5,992,600 by Baudat ("Baudat"). The bank note processing machine disclosed by Baudat is operated by evaluating at least two different properties of a bank note via sensors 20a-c (see column 4, lines 13-17), linking data of said different properties by means of a linear combination (see column 4, lines 17-21 and column 13, line 65 through column 14, line 16), and deriving the state of the bank note from said data (see column 38-46).

Claim Rejections - 35 USC § 103

Claims 5 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Baudat as applied to claims 1 and 6 above, and further in view of Patent Number US 6,234,294 B1 by Defeo et al ("Defeo"). Baudat fails to disclose bank note condition detection. Defeo teaches a bank note processing machine that is operated by detecting

missing parts of a bank note (see Figure 11 steps 1115, 1120 and 1125) for the purpose of determining the condition of a bank note. It would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the condition detection operation of Defeo into the machine of Baudat for the purpose of determining bank note condition.
